FLOW

Experience perfect harmony between Work and Flow with Intuos Pro, our flagship line of professional pen tablets. They've been completely redesigned to provide an all-new level of precision and control over your work – and an intuitive creative experience that lets your ideas flow with effortlessness and efficiency.

Redesigned for precision, efficiency, & ergonomics

Wacom Intuos Pro has been an essential tool for generations of creatives, and this redesign unites 40 years of experience into the ultimate workflow tool. The robust customization options, ergonomic layout of the hardware, and updated connectivity and software features mean Intuos Pro seamlessly integrates with your setup for next-level workflow efficiency.

Feel your flow

The ergonomic layout of mechanical dials and ExpressKeys is perfect for right and left-handed users and their tactile, mechanical feel provides unmatched precision. Use them to emulate a jog wheel for video editing, zoom, change brush size and more and customize them for each application in your workflow.

Pro Pen 3: A Stroke of Genius

Pro Pen 3 is the result of 40+ years of experience and technical innovation, for our most sensitive, accurate, and natural pen performance. Intuos Pro features an improved report rate for reduced pen latency, and as always, Wacom pens require no battery or charging. Amazing stroke performance isn't all – it's also customizable through different grip and button configurations, multiple included nib options, and an adjustable weight so it can be perfectly calibrated to your exact specifications.

Compatibility and connectivity

Whether you use Windows or Mac, with Intuos Pro you can accomplish any creative task with efficiency, consistency, and dependable performance every single time. It's also ultra-thin, compact, rugged, and portable -- the perfect tool for hybrid and mobile working styles.

All three tablet sizes can be used with the included USB cable or wirelessly with Bluetooth. And to keep the flow going without distraction, the Intuos Pro has a switch that toggles between a USB cable connection and either one of two paired Bluetooth devices for instant connection without interruption.
