

# Facts about Eddie

Eddie prints full-colour photographs and text directly onto the surface of food like cookies, lollipops, chocolate, wafers, marshmallows, macarons, crackers and many other suitable food items.

## Feeding mechanism

Print objects can be transported to the printer either manually or automatically with the help of the carousel plate. Depending on the feeding mode, different print widths and heights result. When Eddie is used in manual mode the food needs to be placed directly on the feeding arm. Alternatively, specially made trays can be used.

To print higher objects such as donuts, the Eddie Platform Kit can be installed.

## Technical Specifications

### Print & Object Size

Print width up to 120 mm  
Item width/length max. 120 mm

### Included

DTM Manual Tray M0001 Starter Kit  
one CMY edible ink cartridge  
BarTender UltraLite &  
NiceLabel Free DTM Edition (Windows)  
Belight Swift Publisher 5 (Mac)

## Full food safety certifications

Eddie was designed to be used in food processing environments to fulfill all hygienic standards. Stainless steel housing, easy to clean components and certified ink with EU and FDA approvals make Eddie the safest direct-to-food printer in its class.

## Printhead and ink cartridge

Eddie has the printhead and ink compartment in one cartridge which gives no chance during operation to build up bacteria in ink pipes or fixed installed printheads. If the ink is depleted, the insertion of a new cartridge takes seconds. With every cartridge change, you also always use a new printhead and thus literally get a new printer.

## Customised DTM Trays

Trays and spacers specially developed for Eddie are available for all feeding options. These enable a wide range of objects to be printed. Customised trays can be produced on request.

# Low operation costs

By buying an Eddie, you are investing in your future and opening doors to new business opportunities! Personalised customer orders or large orders with consistent quality are no longer a problem. To perfectly calculate how much profit you can make per decorated food item, you must of course factor in the printing costs. This is very easy with Eddie: In the integrated PrintHub status monitor you can view the printing costs for your print job at any time. Here are a few examples:

# Customer Success Stories
