

iXflash

Increased storage and functionality for your iPhone and iPad

The iXflash allows you to take pictures and videos without using any of your iPhone or iPad's internal memory, not even as a buffer, freeing you to capture even more memories you'll cherish for life. Plus, you can open and work on virtually any type of file, including Word, Excel, PDF, PowerPoint, as well as the ability to open and create many versions of zip files, including using password protection. The iXflash is ideal for playing hi-def 4K movies, music, or other entertainment offerings directly through your iPhone or iPad, including Lossless Audio Files, like flac, which are not natively playable through a standard iPhone / iPad without the iXflash App.

In addition, the iXflash has dual Lightning and USB 3.1 or USB-C connection allowing you to transfer files between multiple devices quickly, securely, and easily.

Mobile storage extension

Data transfer between iOS devices, PC and Mac

Perfect for music and movie collections

Made for
 iPhone | iPad | iPod

Photo / Video Protection

The iXflash supports the Apple Touch ID feature to protect your photos and videos by locking access through fingerprint identification. This feature protects all files stored on the iXflash from being viewed via an unauthorized Apple mobile device or computer, ensuring complete privacy.

Apple MFi certified

The iXflash devices meet Apple's strict design specifications and are MFi (Made for iPhone / iPad / iPod) certified.

Dimensions	4,5 x 1,1 x 0,7 cm
Weight	6 g
Warranty	2 years
Compatibility	iPhone, iPad, iPod touch, PC, Mac

Small device - High capacity

With additional storage capacity of 32 GB, 64 GB, 128 GB, 256 GB, 512 GB or 1 TB, you shouldn't worry about running out of space on your iPhone or iPad. Never be frustrated again because there's no more room for new photos or videos on your phone.

Direct photo / video capture

With the iXflash you can take real-time photos and videos that are transferred directly to the iXflash memory without using the internal memory of your iPhone, iPad or iPod.

Data transfer between all devices

The iXflash can quickly and easily transfer content between multiple iPhones or iPads. So you can share any photos or videos quickly and securely with friends and family. What's more, with the USB 3.1 or USB-C connection, you can back up all your content to a computer or transfer content from a computer to view or listen to on your iPhone or iPad.

Saves battery life

The iXflash saves battery life by switching to power-saving mode when backing up photos and videos. This saves battery life and does not affect the main functionalities of the iPhone or iPad.
