

# iXflash Cube

The backup solution for your Apple iPhone and iPad

The iXflash Cube is the ultimate backup solution for Apple iOS devices, like the iPhone & iPad. It's available with both, a USB type A or USB type C connection. Once connected, the iXflash Cube, with the free iXflash Cube App, will automatically backup all photos and videos as well as all of your contacts from your iPhone/iPad while charging the iPhone/iPad at the same time. All the content stored on the iXflash Cube can be transferred to a PC or Mac, another mobile device, or virtually any storage device with an active USB type A or USB type C connection.

Local data back-up with high data protection

No more fear of losing precious memories

Mac and Windows compatible

Made for  
 iPhone | iPad | iPod

Simply plug the male USB connection side of the charging cable into the USB female side of the iXflash Cube, then connect the USB male side of the iXflash Cube into the USB female side of the charging adapter, which you plug into an electrical outlet. Once the charger is connected to the iPhone/iPad, it begins the backup process instantly.

## Backup while Charging

While your iPhone or iPad is charging, the iXflash Cube will automatically backup all photos and videos stored on your iPhone or iPad (including those stored on your iCloud account when connected to wi-fi) as well as contacts.

## Universally applicable

Works just like a standard USB Flash / Pen drive to connect with any device that accepts a standard USB connection.

## Restore content back to iPhone or iPad

Restore all the photos, videos and contacts back to your original or new iPhone / iPad, maintaining all the original formats (including Live Photo and Burst), including meta information (dates, locations, names, etc.) with the iXflash Cube drive and App.

## User Management

Use the same iXflash Cube for multiple users and the iXflash Cube will recognize and automatically create different folders for each user. That way all the items backed up will maintain their original grouping for easier access and to ensure no confusion when looking for specific content. In addition, the iXflash Cube can be protected by an Apple ID, so that access to the stored data is only possible through release (password, Face ID, fingerprint). This means that all data can also be protected from unauthorised access via Windows PC or Mac.

## Plug and play

The iXflash Cube will work directly with your existing charging cables and adapter plug for excellent compatibility and ease of use.

## Technical Specifications

<b>Capacity</b>	128 GB, 256 GB, 512 GB, 1 TB
<b>Connection</b>	Apple MFi certified Lightning interface & USB 3.1
<b>Variants</b>	USB-A and USB-C
<b>Speed</b>	<ul style="list-style-type: none"> <li>• Read speed: Up to 100 mb/sec</li> <li>• Write speed: Up to 80-90 mb/sec</li> </ul>
<b>Supported file formats</b>	<ul style="list-style-type: none"> <li>• Office Files Support Format: pdf, doc, docx, ppt, pptx, xls, xlsx, key, numbers, pages, html, txt, rtf, rtf, xbm</li> <li>• Video Support Format: m4v, mp4, mov( h264/h265), mpg, mpeg, mv, 3pg, avi, rm, rmvb, ts, flv</li> <li>• Picture Support Format: jpg, jpeg, png, bmp, tif, gif, heic(H256), ico, icns, cur, dng</li> <li>• Music Support Format: mp3, aif, aiff, m4a, m4r, wav, 3gp, aac, caf, alac, ac3, amr, opus, amb, dts, ircam, maud, mp2, nist, ogg, paf, ra, snd, sph, wma, tta, spx, dvms</li> </ul>
